Miss Eastlack Is Married To Lt. Gray

Ceremony Performed Yesterday in New York

Miss Mildred Eastlack, daughter of Dr. and Mrs. H. E. Eastlack, of Parlin, N. J., was married to Lieutenant Howard E. Gray, USMC, son of Mr. and Mrs. B. M. Gray, of Norton, yesterday afternoon at 4 o'clock in the Embassy Room of the Hotel Ambassador in New York. A recep-tion followed in the Trianon Room. The Rev. H. S. Weyrich, of Christ Episcopal Church, South Amboy, N. J., officiated.

The bride, who was given in marriage by her father, wore ivory satin with seed pearl em-broidery on a heart-shaped neckline. She carried a prayer book and white orchid.

Mrs. Philip M. Bradley, of South Amboy, N. J., was matron

B. M. Gray was best man for his son.

The bride is a graduate of Abbot Academy, Andover, Mass., the College of William and Mary,

Delta Delta Delta. The groom is a graduate of the Virginia Polytechnic Institute,

Williamsburg, and is a member of

Child's Usefulness Often Prevents His Delinquency

By Angelo Patri

Peter is past fifteen. He is not one of the fast-learning children and will be over seventeen when he finishes his first year of high school and gets a diploma from junior high. That is a long-time off for a boy of fifteen, especially when he is six feet and up, weighing 165 pounds.

Peter has two brothers in the service, one in the aviation, the other in the navy. He feels ready himself and finds school work childish and futile. I am not saying he is wise about the matter but you cannot expect him to look at it through the teachers' eyes, He is too big for the benches in the school room, he wants something heavier in his hand than a pencil, and with all his heart he wants to get into the marines.

said, "I'm in terrible trouble.
You'll have to help me."

After struggling with himself for a long time Peter had decided He persuaded the officers that he was eighteen, and they, not too certain of his accuracy, gave him a sheaf of papers to fill out, and to have filled out by his people, and have them no-tarized. He handed me the pile.

"I stayed out of school three days. I had to get my papers. I told my mother I was in school. The teacher sent home absentee cards and I took them out of the box. The truant officer called when I was downtown and my

papers, say we were sorry Peter was only lifteen and some odd months old, and send him back to his classroom. His mother wants Sale him to stay home, naturally. Just as naturally he wants to go to war. He keeps coming to me asking me to help him get into the service and nothing I can say about birth certificates seems to

register in his mind. I have a great deal of sympathy been made in America,

or Peter and his kind, A boy,

Decoration for china and earthfor Peter and his kind.—A boy, who is not book-minded, who will never go into the secondary schools, who is mature physically schools, who is mature physically, might be allowed to qualify in some sort of service where he range of colors is practically unwould be trained and disciplined limited. Decorations are produced and allowed to be useful. Some by colors applied to the surface of these boys and girls would be of the finishing glaze. The declearning more, that would be help-ovated piece is then slipped into ful to them in years to come, in the oven or kiln and the colors some job in industry, government are fused with the glaze at a services than they learn now as moderate temperature. unwilling pupils in a book-bound

I am all for laws to protect children who work, I am all for free education for every boy and girl who is able to absorb it from the kindergarten to the university but I am also for the boy and girl who can get a better education in service than they are able to take in a schoolroom.

Useful work under enlightened supervision is a great educational force and many children, who are matured physically and who have about reached the limits of their ability to absorb education in the schools, would be greatly helped if allowed to serve in actual jobs. When boys and girls are well placed in life—that is, in a place where their energies are used to their satisfaction, they do not become delinquent. Delinquents are not bad children. They are, mainly, misplaced, misunderstood children. Give them a chance.

Mrs. Howard E. Gray

Selection of New Chinaware Is Problem for War Bride

The war bride will probably have more trouble getting her dinnerware than any other table necessity (except food, of course).

Deliveries are slow and few retailers have full sets in stock at this time. One store reports that English deliveries are better than American. This same business said that some makers such as English Wedgewood are concenfrating on popular patterns and discontinued others until after the war.

If a bride selects a pattern and decoration on the cheaper may be promises to buy certain pieces even if they are not given to her work. The more expensive plate as a gift, the majority of the may contain an intricate hand-If a bride selects a pattern and Yesterday Peter came to me and stores will put this set away for painted design and a great deal of her. Unless she does this her gold.

ou'll have to help me."

Stores will put this set away for painted design and a great deal of her. Unless she does this her gold.

Quality may be guaranteed by different people and she will have lifficulty getting her pieces any time soon.

Too frequently any dish placed on the table is referred to as china. Actually dinnerware is china. divided into two basic groups china and earthenware. Earthenware lends itself to rapid production and thus is priced lower. Minton Royal Doulton, Crown It is heavy and opaque, Most of Derby, and Couldon. American the Wedgewood productions, in-cluding the popular white, are of the earthenware. The maker does produce china, but it is very The maker bertson.

box. The truant officer cannot when I was downtown and my mother went out to look for me. Now I can't enlist anyway because I'm only fifteen and nine months. You've got to help me. I don't know what to do."

All we could do was return the cannot when I was downtown and my mother went out to look for me. I don't to test your selection of dinner-ware, hold it to the light. China is translucent, and you will be able to see the shadow of your pattern, which features a different for an 8.000-foot free fall are a fal fingers, Another test can be made by striking a pencil against

China will give a musical Salesgirls will speak of bone china. This is very fine china in which calcined cattle bone or bone ash is applied to the china in Popular design. bone ash is applied to the body mixture, making it very white and adding to its translucency. English china is the only true

bone, but great advances have enware is the same and is di-vided into two general types, overglaze and under-glaze. The former is the most popular because its

Overglaze decorations are apolied in three ways: by handpainting, the most expensive; by a decalcomania or printed picture transferred to the china, the cheapest method; or by a print made from a copper plate. Al-hough the latter process is similar to the decalcomania, the print is always in a single color, fre-

quently being just an outline of a pattern, a rose, for example, and the color is filled in by hand. On the ware that is decorated under glaze the decoration is applied directly to the biscuit or unglazed ware. This is done by free hand brush stroke or by copper plate. This decoration covered by the hard translucent

glaze is very durable and cannot wash off.

Many of the popular patterns today such as Lenox's Harvest, sheaves of wheat against a creamy china, or Lenox's Golden Wreath contain a great deal of gold. There are two types of gold decorations

Adeline Gray Hits the Silk Without Fear

Richmond Times-Dispatch, Sunday, July 4, 1943

By Jean Meegan

MANCHESTER, CONN., (A)-If the depression was responsible for the "forgotten man" the second World War has produced the unforgettable woman.

They are the spiritual, if not he lineal heirs of the women who braved the Atlantic Ocean in the seventeenth century, fought Indians on the prairies in the ighteenth, and invaded business and the professions in the nine-

Adeline Gray is a conspicuous example—not as a woman soldier, sailor, or marine, but as a licensed parachute rigger and packer.

She learned about parachutes by using them as a stunt jumper air shows and is now using that information as head of the chute Company in Manchester

Almost every youngster flies kites but doesn't influence the est of their lives as it did in Adeine's case.

"That started me," she says in n quiet, whispering voice, "And when I was 12 years old I read bout Joe Crane, the famous parachule jumper, and I knew that was for me."

This from a blue-eyed blonde, who, if she eyer losses her pres-

ent job, could probably get an-other one as a model. At 19 she was the only woman licensed parachute jumper in Connecticut and, as far as she knows, still is

As one of the "deathless sky devils" she used to pop out of planes at 9,000,feet, carrying a 15pound sack of flour (that etched her descent in the sky for the henefit of the spectators) and open her chute only at 2,000 feet or the glide into the home

She has made 34 such jumps and says, "I like the trill of falling through the air." Her only training for this unearthly occupation was a childhood stunt of jumping off haystacks with an umbrella.

Arcline has a passion for aero-nautics, like some people have a passion for horse racing, poker, yachts: It's her exercise, diver-sion, pastime, and work. The only other person in her family who has any interest in this sort of thing is her high-school-aged brother. Her father has a down-

to-earth job in a textile company. After putting in an eight-hour day (six days a week) cleaning, sewing, folding, and stowing into harnesses the parachutes that come in from civilian pilot training schools for repair, she spends the evening studying meteorology and air navigation for her private pilot's license. She flies on Sundays in a plane bought with the money she made as a stunt jumper and more prosaicly as a

and Wedgewood are probably the leading names. In America Lenox cent store. and Castleton are producing fine china as is Thomas Haviland, whose work originated in France. Rationing Necessary to Winning War; Allows All a Fair Share of Meat

`**********

By Ida Jean Kain

The meat rationing is necessary to winning the war and nobody is kicking about it. Besides, it allows us a fair share of meat. The proposed two and one-half pounds a week per person would seem like a banquet to the people of other nations.

We usually plan the menu around meat, fish or fowl because this is the hearty dish of the meal. It stays with you, Then, there is the nutritional reason. Meat is an excellent source of protein and parachute battalions. When the protein is the building and repair material. Most of our tissues and

organs are made up of protein.

We must have a certain amount of this material every day, but not all of it from meat. Milk, eggs not all of it from meat. Milk, eggs and cheese also furnish complete protein. So even though we come around to having meatless days, we can get along all right. We can get along all right. We can get along all right will assure plants of protein. can rely on beans, peas and soy that will assure plenty of protein:
A small serving of about onebeans for some of the require-ment. The housewife can put her fourth pound of meat, fish or fowl The most trying circumstances ingenuity to work and make up

meals might be a cheese souffle or grilled cheese sandwiches, navy bean soup, lima beans with tomato sauce, or Boston baked beans, enough protein for any man.

Or serve poached eggs with a cheese and cream sauce, and spin-ach on the side. There's a dish to please the family!

A man is apt to think he has to have a generous serving of meat to keep up his strength. Well, what does meat furnish? Protein is the big thing. It also supplies many of the B vitamins. You need all these in the daily menus. But you can get the minerals and vitamins from green leafy vegetables and whole grains and the proteins from the ani-mal products other than meat.

It is not hard to get enough protein to meet your requirements. According to the nutrition yard-stick, the average man needs 70 grams daily, the average woman, rationing plan we are allowed more than that daily), plus a pint of milk, which is needed for calcium and phosphorus anyway, an egg, and cheese or cottage cheese, along with the bread, cereals and vegetables in the menu add up to

your extra-strong thigh muscles into the picture—lets them carry part of the burden. Result: less fatigue, less strain, Some of your garden tools will limber you up in no time, if you use them correctly. Your rake for instance—use it in good sweeping strokes, for a back-andshoulder exercise that's hard to beat. If you have one of those old-fashioned scythes, by all means get it out. The twisting motion

that's part of using this tool whittles waists on the double! Don't—please—go out for a three-hour stretch of gardening bare-faced! Sunshine and fresh air are beauty builders, but a hot
